PROGRAMMER | WEB DEVELOPER | PROJECT MANAGER

📍 8th East Street, Tubod, ILIGAN CITY, 9200, Philippines
📞 9177716228
✉ jobelclarabal@gmail.com

ABOUT ME

I am a Web Master for more than 7 years with some experiences as a Project Manager. As a Project Manager, I lead the planning and implementation of projects. I work closely with the fulfillment team to make sure projects are in schedule and in the right direction to achieve quality products. With my leadership, organizational, analytical and technical skills, I'm sure all projects will be handled efficiently.

As a Web Master, I deal both Front-end and Back-end. I don't do designs but I work closely with the designers and give input (UX/UI) to make sure we are on the same page always. I do the coding of the design and setup the site on the server. Communication is the key for a successful launch of the website and that starts from communicating with the client.

Testing plays a very important role also including mobile responsiveness before deploying the final project live.

On top of that, I've also work as a Call Center Representative with SSI (formerly Western Wats/Opinionology) for more than 2 years so communication or language barrier is not a hindrance.

Programmer/Web Developer with more than 7 years' experience in a variety of fields and an extensive range of skills including MVC Frameworks, CMS, APIs, etc...

Dedicated and customer-focused Programmer/Web Developer with a successful background in leading highly performing teams to meet or exceed objectives. A tactical and inspiring team builder, with experience in training, team development and delivering excellence.

Driven Programmer/Web Developer with more than 7 years of experience in Web/Software Development. An inspiring and conscientious leader, with a strong background in team development, and a solid reputation for assessing business needs, developing cost-saving solutions, increasing sales and driving customer satisfaction.

Strongly focused, with the ability to complete tasks accurately in a fast-paced environment with conflicting deadlines.

Programmer with previous experience as Web Developer and Project Manager, looking to join the executive team of a pioneering and organization with ambitious plans for growth.
